

# Integrating Healthcare Knowledge

The complex challenges faced by today's healthcare organizations are compounded by massive volumes of data emanating from a myriad of structured and unstructured sources. Enterprises must harmonize data elements from disparate sources such as databases, warehouses, data-lakes, medical devices, transaction applications, and even spreadsheets to adequately feed and augment analytic tools intended to generate actionable insights.

Without the **right information management capabilities enabled** by the **right enterprise interoperability tools**, a definitive path to positive change for healthcare organizations is simply not attainable.

## ANZO

### Data Fabric for Automated Data Management & Analytics

ANZO automates mundane IT tasks, modernizes and future-proofs your data infrastructure via open standards, leverages flexible data structures such as graph, and produces *semantically interoperable layers of knowledge* that accelerate comprehensive insights from all sources of business, patient and clinical data.

The ANZO platform is the **backbone** for a new set of approaches for data interoperability, analysis, and insights-driven enterprise business models; Resolving **today's challenges and facilitating strategies** for the future of the modern, digital healthcare enterprise.

### ACCELERATE DIGITIZATION

Collaborate across  
all service lines and  
divisions

Modernize your IT /  
data infrastructure

Reduce dependence  
on proprietary HIT  
vendors

### ENABLE EFFICIENCIES

Common language for  
internal & external  
business interactions

Improve speed/agility  
to new business  
solutions

Integrate disparate  
EMRs

### IMPROVE PERFORMANCE

Influence clinical  
outcomes and improve  
cost of care

Access systems and  
applications via unified  
data platform

Leverage analytics as  
a core competency,  
advancing AI & ML  
initiatives

### EVOLVE ECOSYSTEMS

Develop interoperable  
partner & network  
collaborations

Create meaningful  
relationships with  
patients & consumers

Promote wellness and  
health monitoring as  
fun and rewarding

We enable the shift from complexity to simplicity in the disciplines of **Information Management**.

The ANZO Platform is the last mile interoperability component in your current data architecture that leverages all sources of structured and unstructured data as an **enterprise knowledge graph** for rapid adoption as the single source of truth for driving business advancements.

## Clinical and Business Analytics in Healthcare

- **Inflection point** for information management & enterprise analytics
- Regulatory, Business and Technology drivers challenging infrastructure
- Scale, speed, agility, **efficiency of information management** if critical
- New Big Data/Infrastructure technologies offer great potential, but...

### Market Need

Agnostic access to harmonized, well  
understood, high-quality, governed, disparate data

### Healthcare Business Objectives

- ✓ **Optimize Operational Performance in Shift to Value-Based Programs**
- ✓ **Complimentary Joint-Ventures/Partnerships/Networks/Ecosystems**
- ✓ **Consumerism - access, relationships, personalization**
